

Final Assignment Proposal

Rehan Butt

Hardik Patel

We will be creating a flight booking site for SpaceX.

Proposal and Research:

- Company: SpaceX
- Location: Hawthorne, California
- About SpaceX - Space Exploration Technologies Corp., doing business as SpaceX, is an American aerospace manufacturer and space transportation services company headquartered in Hawthorne, California. It was founded in 2002 by entrepreneur Elon Musk with the goal of reducing space transportation costs and enabling the colonization of Mars.
- About SpaceX Earth to Earth transportation system - SpaceX is proposing a program in which they will be using their rockets to transport people from one city to another on earth in under 60 minutes. (Video - <https://www.youtube.com/watch?v=zqE-ultsWt0>)
- Our proposal - When SpaceX will launch this transportation system, they'll have their own flight booking portal. Our aim is to design that portal and try including other services such as Pickup and drop by a car from Tesla autonomous fleet cars which might be integrated with the system.
- Pages
 - Home (selecting destination and dates)
 - List of all available flights
 - Booking class of service and payment pages
 - Additional services car pickup
 - About the services and why fly SpaceX
 - Help / contact page
- Audience - In the beginning, it will be a bit more expensive than the regular air travel. So the main audience would be the first class passengers who can afford the travel cost. Business travellers will be specially attracted to this because now they can travel to another country for business work and return the same day.
